**Shalina Mishra**  
User Researcher

**Mackenzie Bickling**  
Visual Designer

**Oneka Raj**  
Content Strategist

# Our Team

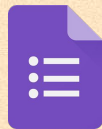

# Project Overview

**The Problem:** Awe is a powerful human emotion that, when experienced, can improve mood and overall well-being. However, experiencing it on a consistent and cost friendly basis can be quite a challenge for the average person. When surveyed, many people reported that their largest deterrents from pursuing their mental health were lack of time and lack of money.

**The Solution:** Our app, Awe, is an event-focused app that prioritizes incorporating awe into the user's routine. We wanted to create a more accessible way for users to experience awe on a consistent basis. Additionally, this would provide a more fun, flexible, and cost-effective way for users to invest in their mental health and well-being.

**Value Proposition Statement:** *Experience awe... anytime, anywhere, anyone.*

Tools:

Our Trello Board

# **Phase 0**

## **Preliminary Research**

# Primary Sources

Dr. Dacher Keltner's lab (Berkeley Social Interaction Lab) and Dr. Jennifer Stellar's lab (Health, Emotions, and Altruism Lab)

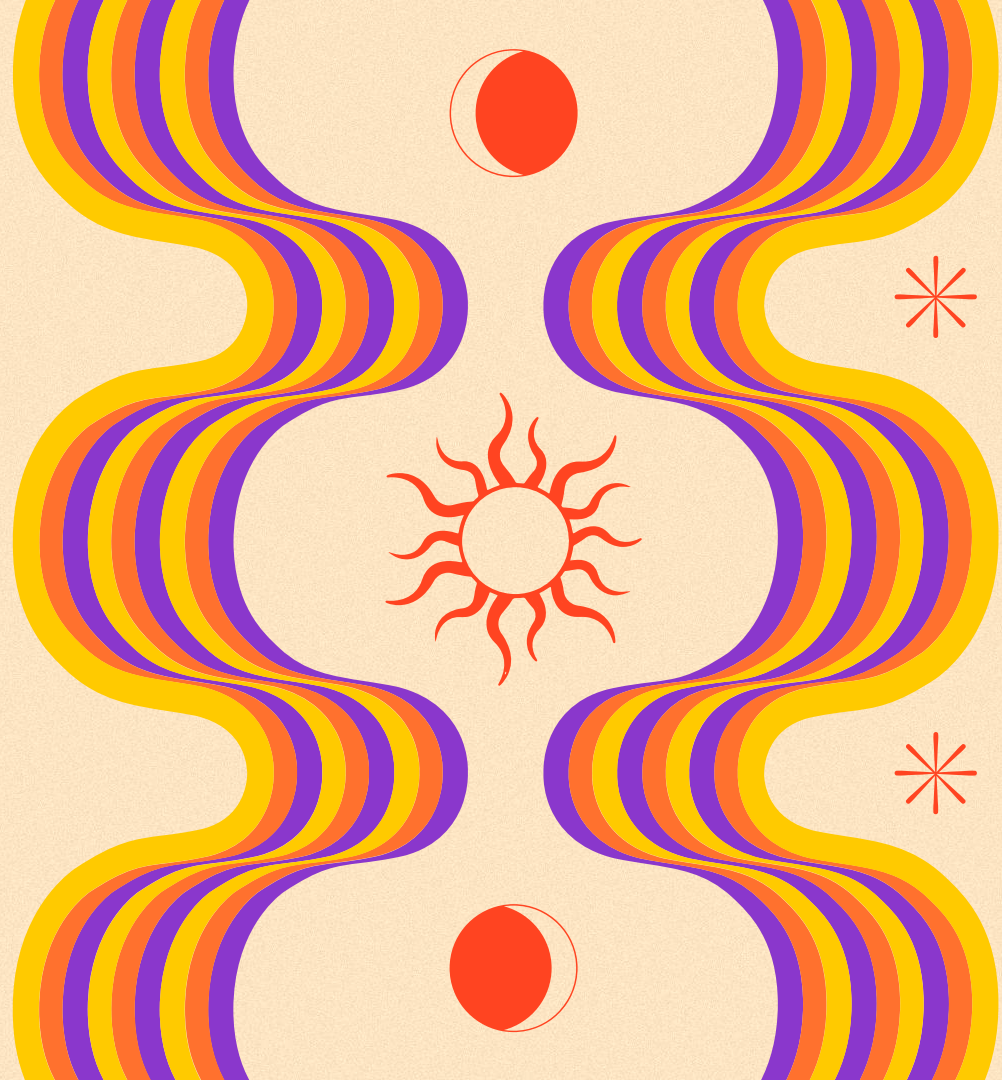

\* compiled resources \*

# Adopted Definition

**Awe**: the feeling of wonder and amazement at being in the presence of something vast that transcends one's current understanding (Keltner & Haidt, 2003).

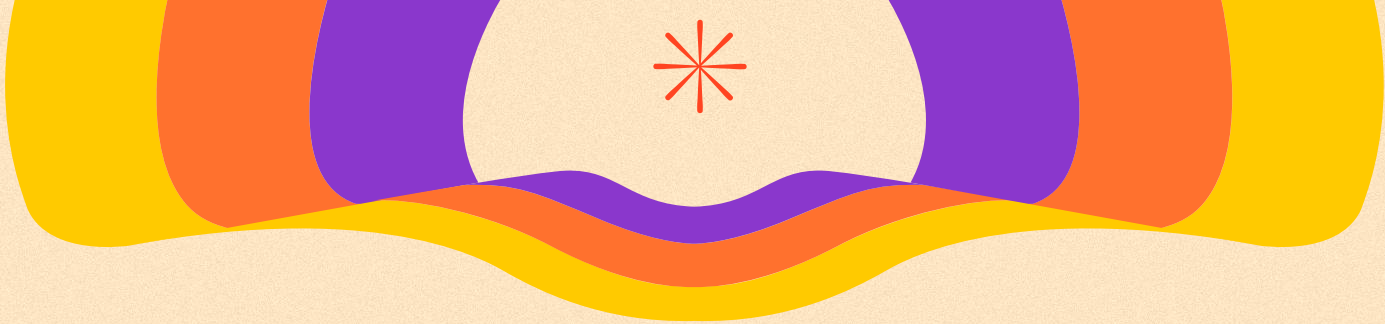

# Benefits of Experiencing Awe

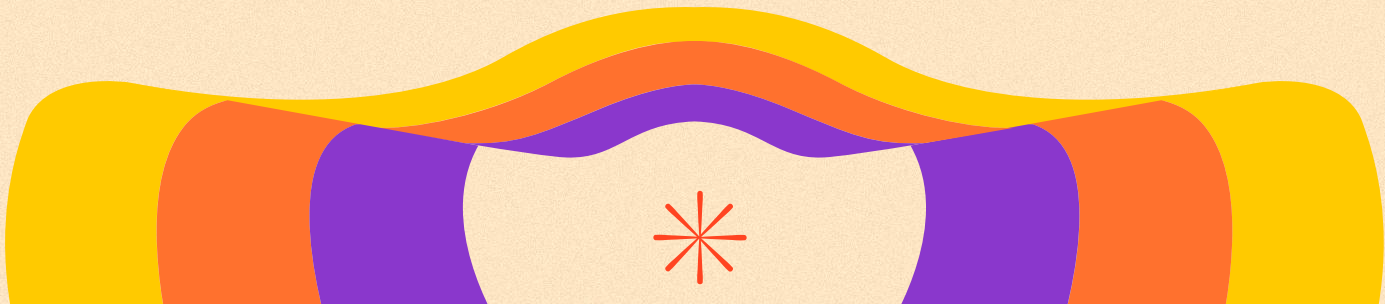

- **Prosocial Thoughts and Behavior**
- **Humility**
- **Interconnection and Curiosity**
- **Reduced Daily Stress**
- **Increased Well-being**
- **Elevated Life Satisfaction**

"The most beautiful thing we can experience is the mysterious. It is the source of all true art and science. He to whom this emotion is a stranger, who can no longer pause to wonder and stand rapt in awe, is as good as dead: his eyes are closed."

— Albert Einstein

# Hypothesis Statement

We hypothesize that developing an app for users to **easily find and attend awe-inducing experiences** will result in users reporting an **improved sense of well-being/mental health** after prolonged and consistent use of the app.

# Phase 1

## Empathize

# Proto-Persona

This is where we fleshed out our assumptions about our potential user.

**Janine Cook**

**27**

## **Behavioral Demographics**

- Speech Language Pathologist
- \$73,000 annual salary
- Outdoorsy/likes connecting with nature
- Loves going to events in her community
- Uses a Mac and iPhone
- Has serious partner
- Health-nut and cares greatly about her diet

## **Goals and Needs**

- Wants to find easy ways to improve her mental health and well-being
- Wants to feel more connected to her community
- Wants to feel more grounded generally
- make the most out of her life every day

## **Pain Points and Potential Solutions**

- Has a hard time finding cool and interesting things to do with her time off from work
- Wants to improve her mental health, but doesn't want to spend a lot of money on a therapist
- Tends to feel overwhelmed by her life and responsibilities, wants to feel more centered
- Wants to improve her mental health, but is apprehensive about traditional therapy pathways

# User Interview Planning

## Research Question:

How do we make awe-inspiring things accessible?

## Objective 1:

As a user researcher, I want to understand what inspires awe in people.

## Objective 2:

As a user researcher, I want to understand how users feel about traditional and non-traditional methods of therapy/self care/mental health.

## Objective 3:

As a user researcher, I want to understand what motivates users to seek out awe-inspiring experiences.

## Objective 4:

As a user researcher, I want to understand what users need (in terms of incentives and barriers) in order to incorporate a new habit into their lives.

## Understanding What Inspires Awe

5) If you had to define awe, how would you define it?

*\*after answer\** Here's the definition our team has researched and adopted for our app— *Awe*: Awe is the feeling of wonder and amazement at being in the presence of something vast that transcends one's current understanding (Keltner & Haidt, 2003).

6) Describe a time when you experienced pure awe.

7) How did that experience make you feel?

## Understanding How Users Feel About Traditional and Nontraditional Therapy/Self Care/Mental Health

8) How do you currently go about taking care of your mental health?

9) What's the hardest part about taking care of your mental health?

10) What do you like about how you currently take care of your mental health?

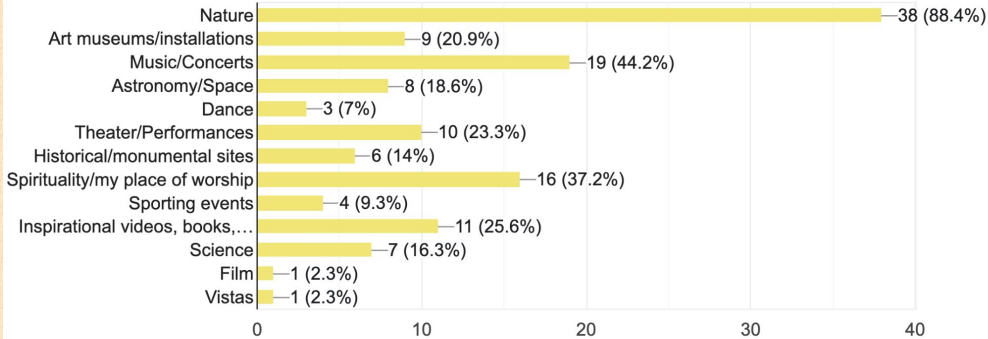

11) What do you feel is missing from your routine that could positively impact your mental health?

## San Luis Obispo, CA

"I'm always looking for that 'I'll never forget this' moment."

### About

- Marketing Coordinator
- Engaged
- Adventurous, flexible, observant, personable, and resourceful
- Loves to be outside, attend concerts, visit art shows/museums, and travel with close friends

### Goals

- Find manageable ways to improve her mental health and well-being
- Easy or not-wants to fully understand a method before she attempts to incorporate it as a habit/routine
- Interact meaningfully with the community around her
- Appreciate the beauty and wonders around her
- Mindfulness

### Frustrations

- Is apprehensive about traditional therapy and the cost, wants to find alternative ways to prioritize her emotional and mental well-being (hard to find what will work for her)
- It takes a lot of effort and time to incorporate new mental health habits into her life
- Has to seek out meaningful events and mental health work outside of her busy work schedule that typically leaves her feeling lazy when done

# **Phase 2**

## **Define**

# Defining

**User Insight Statement:** *A young professional needs a way to incorporate the feeling of awe into their life due to consistent exposure positively impacting their mental health and overall well-being.*

**Problem Statement:** *We believe creating a more accessible way for young professionals to experience awe will improve individual well-being.*

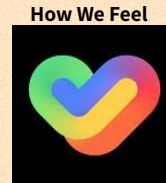

# Phase 3

# Competitor Analysis

| Onboarding Competitive Analysis | Feature Analysis   | Competitive Advantage   | Strengths   | Weakness   | Customer Reviews  | General Notes   | Questions/Notes to Team  |
|---------------------------------|--|---|---|--|---|---|--|
| <b>DIRECT COMPETITORS</b>       |  |   |   |  |   |   |  |
| <b>Nudge</b>                    | <ul style="list-style-type: none"> <li>-Can change location to match wherever you might be traveling to</li> <li>-Users can curate and post their own cool experiences for others to try</li> <li>-Fun color scheme and simple layout</li> <li>-Offer a "Plus" version, which allows user to access more activity suggestions</li> </ul> | <ul style="list-style-type: none"> <li>-Nothing else out there like this yet</li> <li>-Have a strong email presence</li> <li>-Experiences are truly unique, and offer something fresh for users to try</li> </ul> | <ul style="list-style-type: none"> <li>-Coaching bubbles are very helpful at explaining how the app works</li> <li>-Experiences are truly unique and pull the user out of their comfort zone</li> <li>-Experiences are presented in a visual story format, much like social media</li> <li>-Further details about the experience</li> </ul> | <ul style="list-style-type: none"> <li>-Cannot search for things to do on the free plan</li> <li>-Labeled activity tabs at the top falsely lead the user think they are able to explore experiences by category</li> <li>-Because the app's free model is based on only sending suggestions a couple times a week, app isn't very</li> </ul> | Rated 4.7 out of 5 stars on the app store.  | A very cool idea that helps users find unique/diversified experiences in their area, either for date nights, outings with friends, special events, etc. I feel like this app also utilizes email and text well so that users aren't bombarded with app notifications. | How can we make the Awe app inclusive of users' ideas and suggestions for new awe experiences? How can we capitalize on users' knowledge of their local offerings and surroundings for more specialized experiences? |
| <b>Headspace</b>                | bright colours, simple and direct catchphrase on splash page, easy log in options, friendly animation, very simple formatting of text and buttons  | Provides both physical and meditative exercises, inclusive of different populations, tracks daily progress  | Focuses on mindfulness/emotional regulation through meditation, offers daily schedule of  | Cost of subscription slightly expensive after free trial, not as many visuals during meditations   | Rated 4.8 out of 5 stars on app store   | This app is mainly focused on meditation as a pathway to better mental health   | How do we make the Awe app inclusive of various different events/venues instead of just a couple focused events/activities that individuals can attend?  |
| <b>INDIRECT COMPETITORS</b>     |  |   |   |  |   |   |  |
| <b>How We Feel</b>              | sleek, but colorful aesthetic. Informative coaching screens. Immediate personalization. Lists benefits of the app off the bat. Calming animations and colors. Intuitive interaction. Encourages  | offers a lot of information about understanding and regulating our emotions. Interactive tracking feature + app's ability to detect patterns gives us insights into our lives and our feelings. Guided            | great repository of videos. Advice and guidance for all emotions. Heavy on user interaction. Compiles and tracks a lot of data  | all videos are 1-2 minutes, so no access to something more in depth  | 4.9/5.0: "the world would be a much better place if everyone had this app" "great for reflection" "helps with emotional literacy" | seems very helpful, tackles one aspect of mental health (understanding emotions, regulating emotions), but seems to still do wonders for overall improvement of   | only 101 reviews so far, but all are positive except for a couple that report bug issues...but content of the app itself seems to be great for the users which is cool bc we're also                                 |
| <b>StubHub</b>                  | seat preview best selection and more, bright colors purple pink and blue, get tickets up to the last second, "100% guaranteed tickets and award-winning customer service", alerts when your  | Users can browse all sorts of events near a particular location and date without fear that their desired event will be sold up-can buy and sell tickets up to the last second.                                    | Onboarding process was visually pleasing and easy to understand/click through, like how can browse app a little on  | Design bland, not exciting, not easy to compare to other options (price wise not sure if getting best deal), once click on artist  | 4.8/5 stars on the app store-bad reviews say not trustworthy in terms of value and bad customer service                           | I feel like one only uses/downloads this app when they already have a specific event in mind, not great for browsing/getting ideas, seems strictly  | How can we make it exciting to browse/explore different activities/events that inspire awe? A start would be including an upbeat description and WHY they'd wanna go   |
|                                 |  |   |   |  |   |   |  |
|                                 |  |   |   |  |   |   |  |

## I Wish...

I could  
feel awe  
at work

something  
would help me  
reflect after an  
awe-inspiring  
experience

Taking care of  
my mental  
health wasn't  
so expensive

I had a more  
flexible work  
schedule so I  
could invest in my  
mental health

Time to  
practice  
new healthy  
habits

I could have  
better control  
over my  
mental health

I knew a good  
place to look  
at the stars  
near me

it didn't take  
so long to find  
something fun  
to do on the  
weekend

I could  
experience  
awe at least  
once a week

habits were  
easier to  
keep

I had  
motivation to  
focus on my  
mental health

I had easier  
access to  
mental health  
resources

I knew all of  
the cool  
spots  
around me

I could feel  
more  
grounded  
/mindful

Traveling  
wasn't so  
expensive

I could be better  
informed about  
the science  
behind mental  
health

I could feel the  
"vacation high"  
without  
actually going  
on vacation

I could have  
something  
interesting and  
fun to do that  
breaks up day-to-  
day mundanity

## What if...

I could feel  
awe at the  
push of a  
button

All of my  
mental  
health issues  
disappeared

all mental  
health  
care/resources  
were free

work  
improved my  
mental  
health

my work  
caused me  
to feel awe

we could capture  
an emotion and  
replay it whenever  
we wanted

we had  
more time  
in the day

I knew all the  
exciting/  
interesting  
things to do in  
my town

everyone  
could  
experience  
awe regularly

society  
was  
kinder

work gave  
unlimited PTO  
to address my  
mental health

I didn't have to  
choose between  
work and  
balancing my  
mental health

more people  
bought into  
the benefits  
of awe

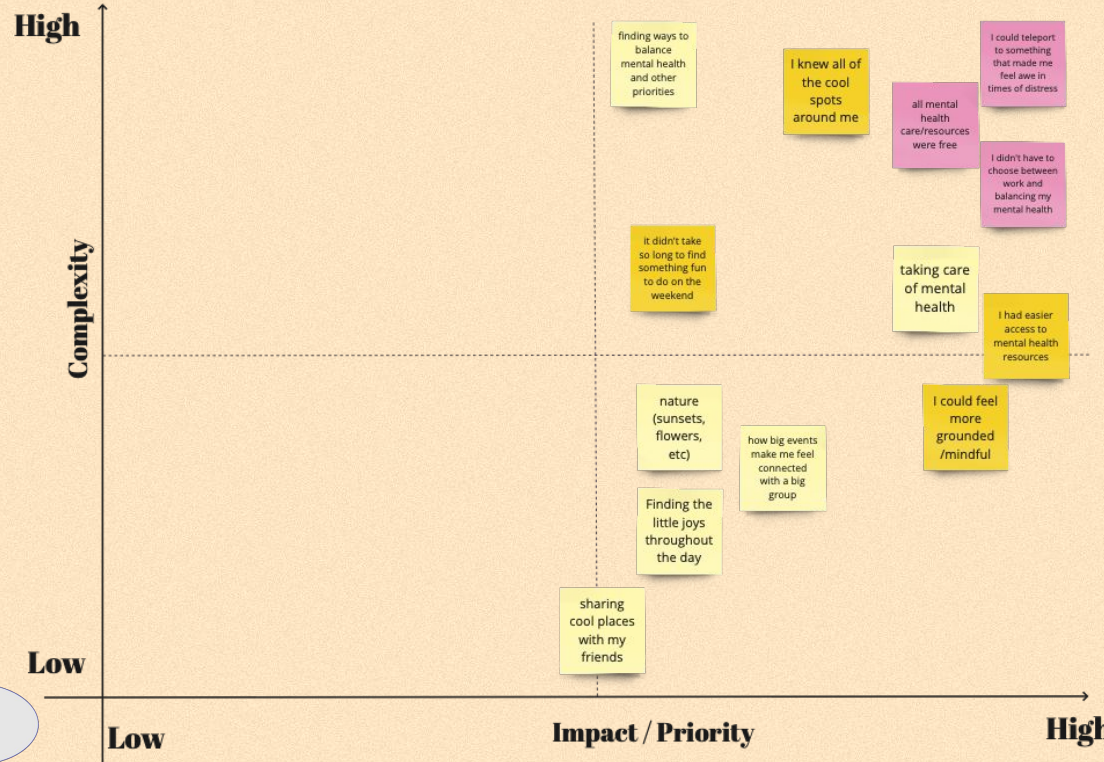

You could take an  
awe tour when  
you visited a new  
city or a new  
country

I could integrate  
to something  
that made me  
feel awe in  
times of distress

# Feature Prioritization Matrix

## KEY:

I Like...  
I wish...  
What if...

## 3 Key Features

- Reflection Feature
- Events Feature
- Day-to-Day Feature

# User Journey Map

User Name

Jenny Chan

Age

27 Years

Occupation

Marketing  
Coordinator

Location

San Luis Obispo,  
CA

User Motivations

Jenny deeply values her well-being and understands the importance of taking care of herself. She enjoys doing this individually, but also enjoys finding ways to do this with friends.

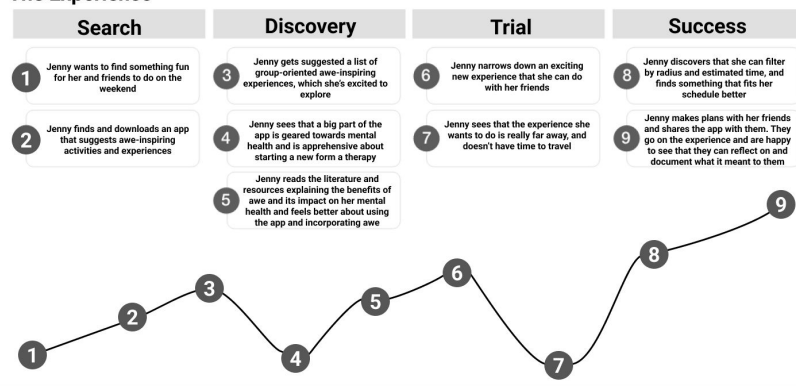

## UX Scenario

Jenny, a young professional in CA wants to find ways to prioritize her mental health when she's not at work. She likes going out with friends and wants to find activities/events on the weekend in her local area. Jenny wants to make the most out of her time off from work and improve her emotional wellbeing.

## Goals

- find manageable ways to improve her mental health
- truly understand a method before making it a new habit
- interact meaningfully with the people around her
- appreciate the beauty and wonders in the world
- practice mindfulness

## The Experience

## Opportunities

- Finding events can be hard due to distance/traveling --> Filters in app to narrow down results to experiences that are near by
- Finding the time to enjoy experiences can be hard due to schedule --> seeing estimated time of an experience can help with planning
- Not having enough time to enjoy an experience --> User can put how much time they are able to spend and experiences are filtered based off of user input

# User Storyboard

Jenny wants to find something fun for her and friends to do on the weekend.

Jenny finds and downloads an app that suggests awe-inspiring activities and experiences.

Jenny sees that a big part of the app is geared towards mental health and is apprehensive about starting a new form a therapy.

Jenny reads the literature and resources explaining the benefits of awe and its impact on her mental health and feels better about using the app and incorporating awe.

Jenny narrows down an exciting new experience that she can do with her friends, but she realizes that it's really far away and doesn't have enough time to travel.

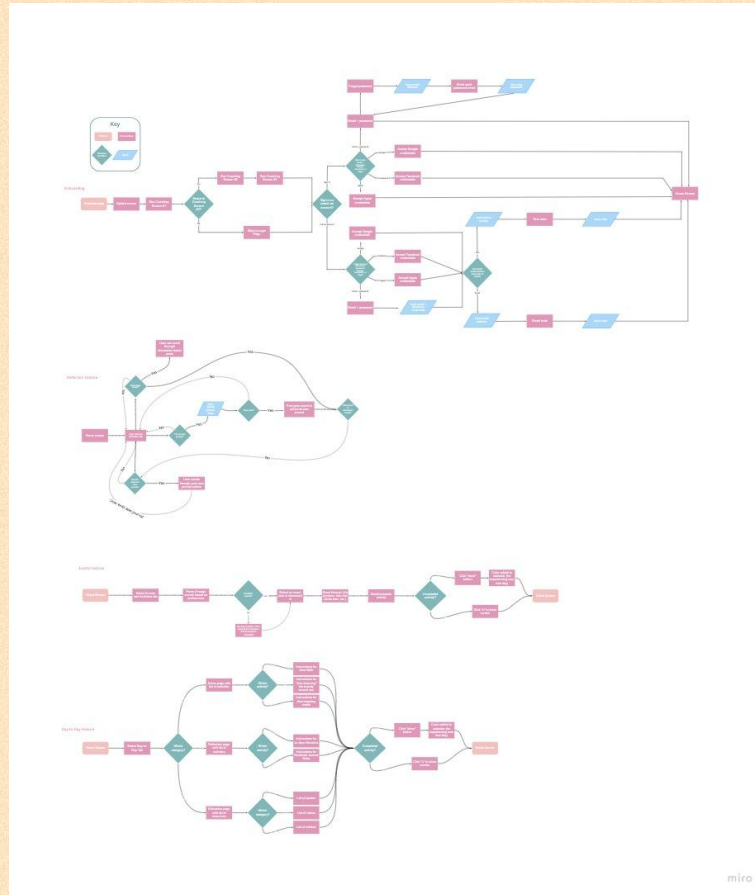

Jenny discovers that she can filter by radius and estimated time, and finds something that fits her schedule better. She shares the app and her plans with her friends, and they're all excited!

# User Testing Plans

## 1. Objective

What is your objective for conducting this guerrilla test?

My objective for conducting this guerrilla test is to make sure users are able to navigate and complete the onboarding process of our app.

Why are you doing the test? What are you hoping to learn? I am doing the test to see where there might be large scale, glaring usability issues that I need to address and resolve before going further with the design process. I am hoping to learn which pieces of the onboarding experience are frustrating or confusing to the user, and likewise, which pieces they enjoy the most.

## 2. Target Users

Are you looking for a target user?

Yes.

If so, who are you targeting?

I am looking for a young professional between the ages of 18-29.

[Link to our User Testing Plans](#)

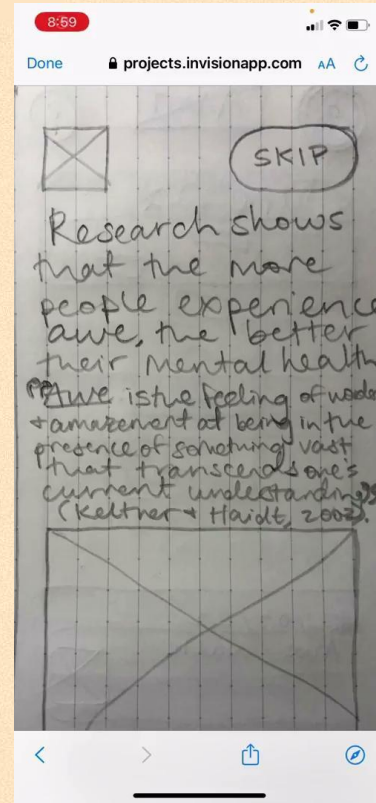

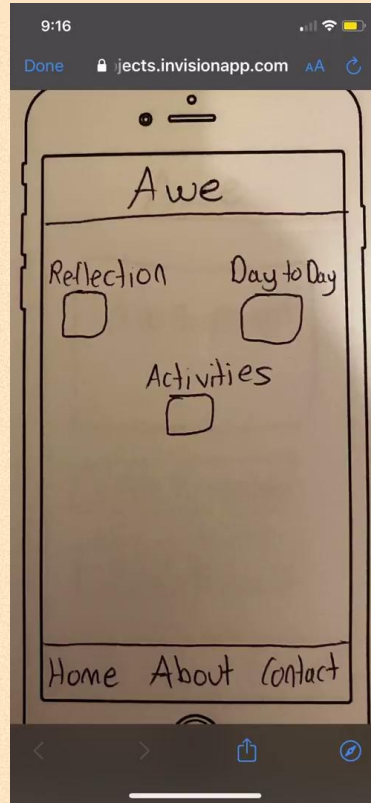

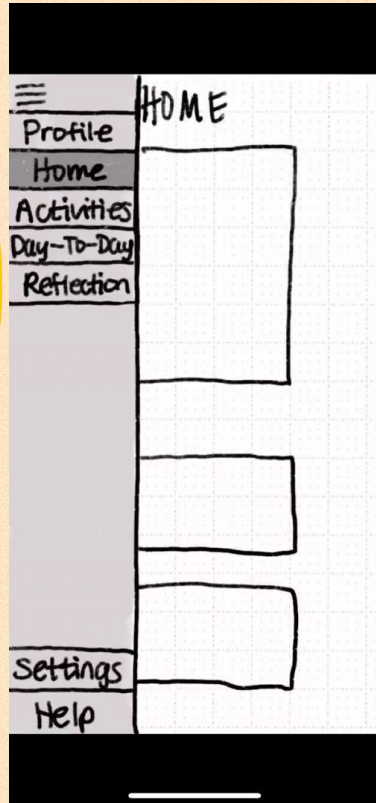

### Task 3: Book event

|                          |  |
|--------------------------|--|
| <b>Goal/Output:</b>      | Book an awe-inspiring event  |
| <b>Assumptions:</b>      | User wants to book an event that takes a little more planning.   |
| <b>Steps:</b>            | <ol style="list-style-type: none"><li>1. Click on event tab</li><li>2. Click event you're interested in</li><li>3. Click book</li><li>4. Reach success screen<ol style="list-style-type: none"><li>a. Optional-view calendar</li></ol></li></ol> |
| <b>Success Criteria:</b> | Event is booked and they can view it on their calendar.  |

Our user testing plans included our objectives for what we're wanting to discover about our prototypes, as well as tasks for our testers to complete and give feedback on.

button vs  
exit button

screen for  
uploading on  
discussion  
board?

# User Testing Analysis Cont'd

Low Priority for Users

High Priority for Awe App

High Priority for Users

Low Priority for Awe App

## Suggestions

- Add SSO sign in credentials screens
- Remove "learn more" button on first coaching screen
- rate day-to-day activities?
- add way to sort events
- way to "like" an event/add to wishlist
- Categories scroll at top for events? (ex. AirBNB)
- calendar to easily track awe-experiences
- fix prototype flows for some of the screens
- add more/varying reflection prompts

## Navigation

- make it easier to access home wherever you are
- make "back" and "exit" buttons distinct
- Help user know how to navigate coaching screens better
- make buttons more intuitive to navigate
- search bar for events
- user control and freedom-make back and exit buttons more consistent
- Home button vs exit button

## Clarity

- Add progress bubbles for coaching screens
- Make home screen more identifiable
- make tabs clearer
- clear instructions and examples for prompts/activities
- screen for uploading on discussion board?
- make "back" and "exit" buttons distinct

## Streamline?

- combine day-to-day reflection and reflection tab
- combine awe prompts and awe journal?

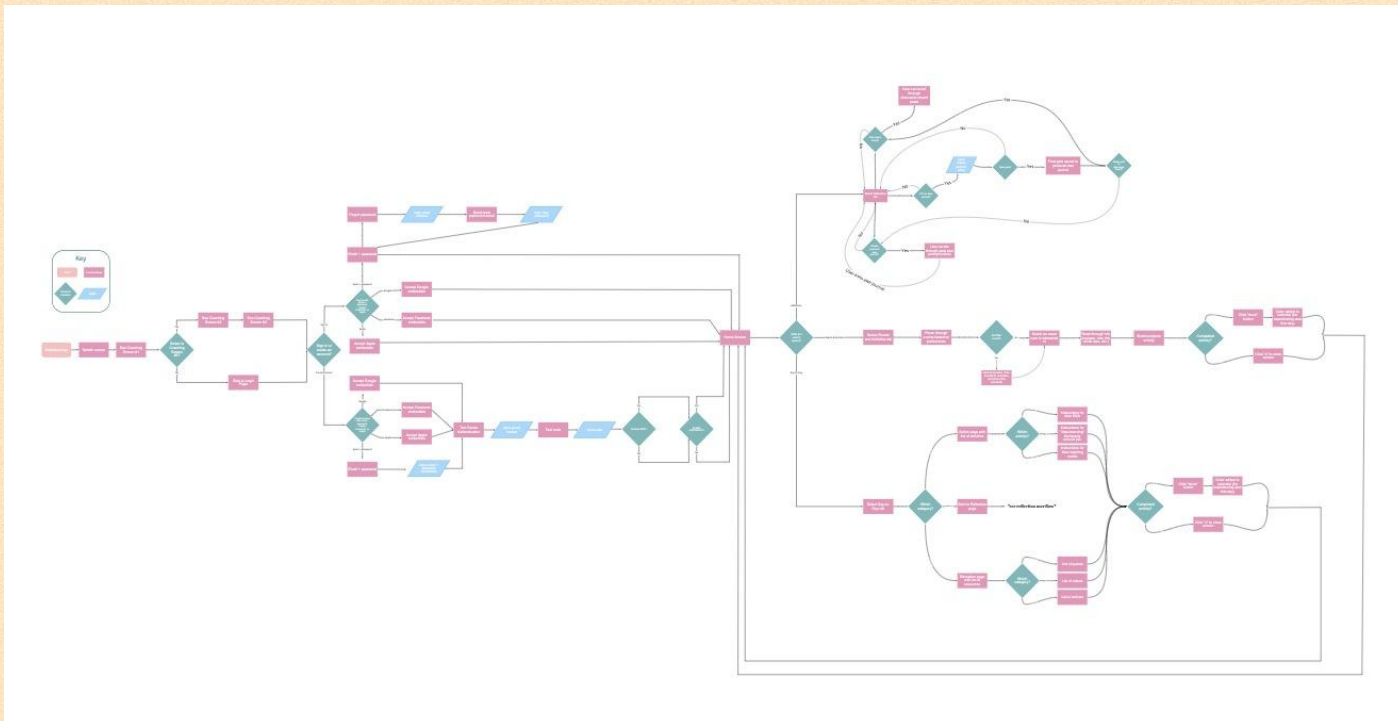

# Key Iteration Takeaways

- Make back/exit buttons **more consistent/uniform**
  - **Make tabs clearer**
  - Make it **easy for user to access home screen from any screen**, and make home screen more identifiable
  - **Add calendar element** to make a place for users to keep track of their exposure to awe from all the different features "Awe" offers
  - **Make buttons more intuitive to navigate**
- 
- 
- 

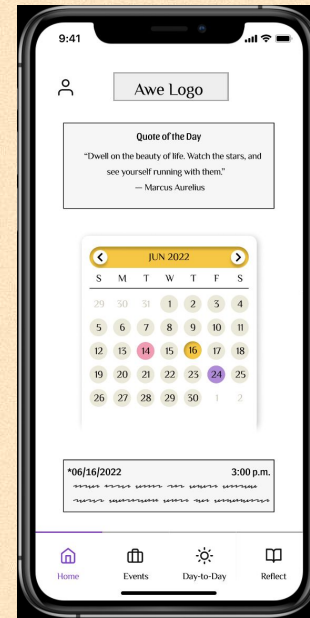

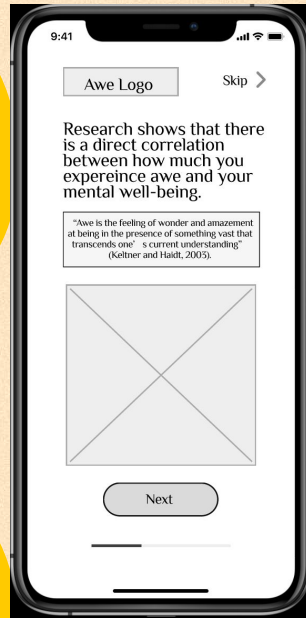

# User flow Version 2

[Link to Final Iteration of User Flow](#)

# final Prototype

[Link to Full Figma Clickable Prototype](#)

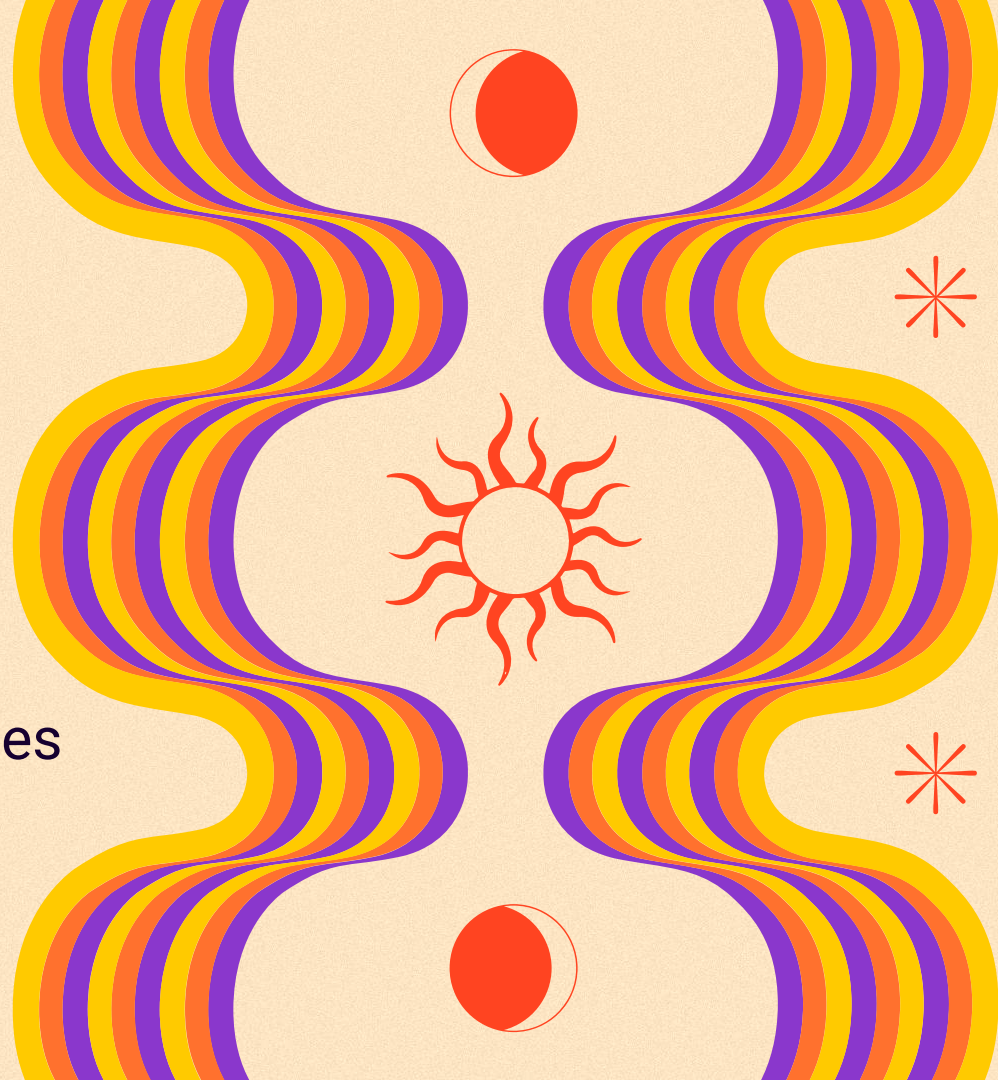

# future Opportunities

- High-Fidelity Prototype
- Awe-sponsored Events
- User input for events/activities
- Wishlist Feature

# Lessons Learned

- When creating clickable prototypes in Figma, make sure to be more methodical when copying and pasting elements. It can be incredibly confusing to try and undo connections made previously to screens now completely irrelevant to this new element.
  - During group work sections, focus on what needs to be done collectively. Be realistic about what can be individual work.
  - Determine consistency standards as a group before doing the work. It's harder to be thorough with consistency after the fact.
  - Don't stick to templates of problem statements or user insights, being clear and concise is more important
- 
- 
- 

# Thanks!
